

National Core Indicators
Aging and Disability Adult Consumer Survey

2015-2016 Tennessee Results

Preface

TennCare is Tennessee’s Medicaid program that provides physical and behavioral health and long-term services and supports (LTSS) for 1.5 million Tennesseans, roughly 20 percent of the state’s population. TennCare is one of the oldest Medicaid managed care programs in the country, and the only program in the nation to enroll the entire state’s Medicaid population, including older adults and people with disabilities, into managed care. The TennCare program operates under a Section 1115 waiver from the [Centers for Medicare and Medicaid Services](#) (CMS). TennCare is an integrated, full-risk, managed care program. Physical and behavioral health and LTSS are covered by three statewide [Managed Care Organizations](#) (MCOs). All TennCare’s MCOs are accredited by the National Committee on Quality Assurance and ranked among the top 100 Medicaid health plans in the country.

TennCare CHOICES in Long Term Services and Supports (“CHOICES”) provides LTSS, including Nursing Facility services and home and community based services (HCBS), to older adults and adults with physical disabilities in Tennessee. Implemented in 2010, the program is the result of sweeping reform legislation: The Long-Term Care Community Choices Act of 2008, passed unanimously by the Tennessee 105th General Assembly. In addition to expanding access to HCBS and achieving a more equitable balance of institutional versus HCBS expenditures, the Act set forth clear expectations regarding quality, requiring that the state’s LTSS system *“include a comprehensive quality approach across the entire continuum of long-term care services and settings that promotes continuous quality improvement and that focuses on customer perceptions of quality, with mechanisms to ensure ongoing feedback from persons receiving care and their families in order to immediately identify and resolve issues, and to improve the overall quality of services and the system.”*

Measuring quality from the perspective of those who receive services is what Tennessee’s participation in the NCI-AD is all about. While the state has conducted an annual satisfaction and quality of life survey for several years, transition to the NCI-AD will allow for comparison of performance not just among MCOs, but also with other state’s LTSS programs, and, in particular, other states’ MLTSS programs. NCI-AD’s indicators and outcomes that assess quality of life, community integration, and person-centered services will help TennCare, in partnership with our stakeholders, to monitor compliance with the HCBS settings rule, and identify potential gaps in services or in social supports that are key to helping people achieve their person-centered goals and live meaningful lives in their homes and communities. We are committed to measuring the things that matter, that have the greatest potential to make a difference in the lives of those we serve and their families, and to using that information to make the CHOICES program better.

List of Abbreviations Used in This Report

HCBS – Home and Community Based Services

HSRI – Human Services Research Institute

MCO – Managed Care Organization

N – Number of respondents

NASUAD – National Association of States United for Aging and Disabilities

Table of Contents

Preface	2
List of Abbreviations Used in This Report.....	5
Table of Contents.....	6
What is NCI-AD?.....	28
NCI-AD Survey.....	28
Survey Overview	28
Figure 1. NCI-AD Domains and indicators.....	29
Organization of the Survey	31
NCI-AD in Tennessee.....	32
Sample.....	33
Figure 2. MCOs and Groups included, number of surveys, and margins of error	35
Survey Process	36
Stakeholders	36
Organization of Results.....	37

Limitations of Data.....	38
Community Participation	40
Graph 1. Proportion of people who are able to do things they enjoy outside of their home when and with whom they want to.	41
Choice and Decision Making.....	42
Graph 2. Proportion of people who are able to choose their roommate (if in group setting)	43
Graph 3. Proportion of people who get up and go to bed at the time when they want	43
Graph 4. Proportion of people who can eat their meals when they want.....	44
Graph 5. Proportion of people who are able to decide how to furnish and decorate their room (if in group setting)	44
Relationships.....	45
Graph 6. Proportion of people who can always or almost always see or talk to friends and family when they want to (if there are friends and family who do not live with person).....	46
Graph 7. Proportion of people who sometimes or often feel lonely, sad or depressed	46
Satisfaction.....	47
Graph 8. Proportion of people who like where they are living	48
Graph 9. Proportion of people who would prefer to live somewhere else	48

Graph 10. Proportion of people who like how they usually spend their time during the day.....	49
Graph 11. Proportion of people whose paid support staff change too often.....	49
Graph 12. Proportion of people whose paid support staff do things the way they want them done.....	50
Service Coordination.....	51
Graph 13. Proportion of people who know whom to call if they have a complaint about their services	52
Graph 14. Proportion of people who know whom to call to get information if their needs change and they need new or different types of services and supports	52
Graph 15. Proportion of people who can reach their case manager/care coordinator when they need to (if know they have case manager/care coordinator)	53
Graph 16. Proportion of people whose paid support staff show up and leave when they are supposed to	53
Graph 17. Proportion of people who have an emergency plan in place.....	54
Graph 18. Proportion of people who want help planning for their future need for services.....	54
Graph 19. Proportion of people whose services meet all their needs and goals.....	55
Graph 20. Proportion of people whose case manager/care coordinator talked to them about services that might help with unmet needs and goals (if have case manager and have unmet needs and goals)	55
Graph 21. Proportion of people whose family member (unpaid or paid) is the person who helps them most often.....	56
Graph 22. Proportion of people whose family member (unpaid or paid) provides additional assistance	56

Care Coordination.....	57
Graph 23. Proportion of people who stayed overnight in a hospital or rehabilitation facility (and were discharged to go home) in past year.....	58
Graph 24. Proportion of people who reported feeling comfortable and supported enough to go home after being discharged from a hospital or rehabilitation facility (if occurred in the past year)	58
Graph 25. Proportion of people who reported someone followed-up with them after discharge from a hospital or rehabilitation facility (if occurred in the past year).....	59
Graph 26. Proportion of people who reported having one or more chronic condition(s)	59
Graph 27. Proportion of people who reported they know how to manage their chronic condition(s)	60
Access.....	61
Graph 28. Proportion of people who have transportation when they want to do things outside of their home.....	62
Graph 29. Proportion of people who have transportation to get to medical appointments when they need to.....	62
Graph 30. Proportion of people who receive information about their services in the language they prefer (if non-English)	63
Graph 31. Proportion of people who need new grab bars in the bathroom or elsewhere in home	63
Graph 32. Proportion of people who need an upgrade to grab bars in the bathroom or elsewhere in home	64
Graph 33. Proportion of people who need new bathroom modifications (other than grab bars)	64
Graph 34. Proportion of people who need an upgrade to bathroom modifications (other than grab bars)	65

Graph 35. Proportion of people who need a new specialized bed	65
Graph 36. Proportion of people who need an upgrade to specialized bed	66
Graph 37. Proportion of people who need a new ramp or stair lift in or outside the home.....	66
Graph 38. Proportion of people who need an upgrade to a ramp or stair lift in or outside the home.....	67
Graph 39. Proportion of people who need a new remote monitoring system.....	67
Graph 40. Proportion of people who need an upgrade to remote monitoring system.....	68
Graph 41. Proportion of people who need a new emergency response system.....	68
Graph 42. Proportion of people who need an upgrade to emergency response system.....	69
Graph 43. Proportion of people who need new other home modifications.....	69
Graph 44. Proportion of people who need an upgrade to other home modifications.....	70
Graph 45. Proportion of people who need a new walker	70
Graph 46. Proportion of people who need an upgrade to a walker	71
Graph 47. Proportion of people who need a new scooter.....	71
Graph 48. Proportion of people who need an upgrade to a scooter	72
Graph 49. Proportion of people who need a new cane	72

Graph 50. Proportion of people who need an upgrade to cane	73
Graph 51. Proportion of people who need a new wheelchair	73
Graph 52. Proportion of people who need an upgrade to a wheelchair	74
Graph 53. Proportion of people who need new hearing aids	74
Graph 54. Proportion of people who need an upgrade to hearing aids	75
Graph 55. Proportion of people who need new glasses	75
Graph 56. Proportion of people who need an upgrade to glasses.....	76
Graph 57. Proportion of people who need a new communication device	76
Graph 58. Proportion of people who need an upgrade to a communication device	77
Graph 59. Proportion of people who need new portable oxygen	77
Graph 60. Proportion of people who need an upgrade to portable oxygen.....	78
Graph 61. Proportion of people who need new other assistive device	78
Graph 62. Proportion of people who need an upgrade to other assistive device	79
Safety	80
Graph 63. Proportion of people who feel safe at home.....	81

Graph 64. Proportion of people who feel safe around their paid support staff	81
Graph 65. Proportion of people who are ever worried for the security of their personal belongings.....	82
Graph 66. Proportion of people whose money was taken or used without their permission.....	82
Graph 67. Proportion of people who have concerns about falling or being unstable (or about whom there are concerns)	83
Graph 68. Proportion of people with whom somebody talked to or worked with to reduce risk of falling or being unstable (if there are such concerns)	83
Graph 69. Proportion of people who are able to get to safety quickly in case of an emergency like a fire or a natural disaster ..	84
Health Care	85
Graph 70. Proportion of people who have gone to the emergency room for tooth or mouth pain in past year	86
Graph 71. Proportion of people who have gone to the emergency room for falling or losing balance in past year	86
Graph 72. Proportion of people who have gone to the emergency room in past year (for reasons other than tooth/mouth pain or falling/losing balance)	87
Graph 73. Proportion of people who have a primary care doctor	87
Graph 74. Proportion of people who can get an appointment to see their primary care doctor when they need to.....	88
Graph 75. Proportion of people who have talked to someone about feeling sad and depressed during the past 12 months (if feeling sad and depressed)	88
Graph 76. Proportion of people who have had a physical exam or wellness visit in the past year.....	89

Graph 77. Proportion of people who have had a hearing exam in the past year	89
Graph 78. Proportion of people who have had a vision exam in the past year	90
Graph 79. Proportion of people who have had a flu shot in the past year	90
Graph 80. Proportion of people who have had a routine dental visit in the past year	91
Graph 81. Proportion of people who have had a cholesterol screening done by a doctor or nurse in the past five years	91
Wellness	92
Graph 82. Proportion of people who describe their overall health as poor	93
Graph 83. Proportion of people who reported their health is much better or somewhat better compared to 12 months ago	93
Graph 84. Proportion of people who reported they forget things more often than before during the past 12 months	94
Graph 85. Proportion of people who have discussed (or somebody else discussed) their forgetting things with a doctor or a nurse (if forget things more often during the past 12 months)	94
Medications	95
Graph 86. Proportion of people who take medications that help them feel less sad or depressed	96
Graph 87. Proportion of people who take or are supposed to take any prescription medications	96
Graph 88. Proportion of people who understand why they take their prescription medications and what they are for (if take or are supposed to take prescription medications)	97

Rights and Respect.....	98
Graph 89. Proportion of people who feel that their paid support staff treat them with respect	99
Graph 90. Proportion of people who report that others ask permission before entering their home/room.....	99
Graph 91. Proportion of people who are able to lock the doors to their room if they want to (if in group setting)	100
Graph 92. Proportion of people who have enough privacy in their home (if in group setting)	100
Graph 93. Proportion of people who are able to have visitors come at any time (if in group setting)	101
Graph 94. Proportion of people who have privacy with visitors at home if they want it (if in group setting)	101
Graph 95. Proportion of people who can use the phone privately whenever they want to (if in group setting)	102
Graph 96. Proportion of people who have access to food at all times of the day (if in group setting).....	102
Graph 97. Proportion of people whose mail or email is read without asking them first (if in group setting).....	103
Self-Direction of Care.....	104
Graph 98. Proportion of people who are participating in a self-directed supports option (as defined by their State—data for this indicator come directly from State administrative records)	105
Graph 99. Proportion of people who can choose or change what kind of services they get and determine how often and when they get them.....	105
Graph 100. Proportion of people who can choose or change who provides their services if they want to.....	106

Work.....	107
Graph 101. Proportion of people who have a paying job in the community, either full-time or part-time.....	108
Graph 102. Proportion of people who would like a job (if not currently employed)	108
Graph 103. Proportion of people who reported that someone has talked to them about job options (if wanted a job)	109
Graph 104. Proportion of people who do volunteer work.....	109
Everyday Living.....	110
Graph 105. Proportion of people who generally need a lot or some assistance with everyday activities (things like preparing meals, housework, shopping or taking their medications)	111
Graph 106. Proportion of people who always get enough assistance with everyday activities when they need it (if need any assistance) (things like preparing meals, housework, shopping or taking their medications)	111
Graph 107. Proportion of people who generally need a lot or some assistance for self-care (things like bathing, dressing, going to the bathroom, eating, or moving around their home)	112
Graph 108. Proportion of people who always get enough assistance with self-care when they need it (if need any assistance) (things like bathing, dressing, going to the bathroom, eating, or moving around their home)	112
Graph 109. Proportion of people who have access to healthy foods like fruits and vegetables when they want them	113
Affordability	114
Graph 110. Proportion of people who ever have to skip a meal due to financial worries	115

Planning for future	116
Graph 111. Proportion of people who want help planning for their future need for services.....	117
Control	118
Graph 112. Proportion of people who feel in control of their life	119

What is NCI-AD?

The National Core Indicators for Aging and Disabilities© (NCI-AD), are standard measures used across participating states to assess the quality of life and outcomes of seniors and adults with physical disabilities—including traumatic or acquired brain injury (TBI/ABI)—who are accessing publicly-funded services through Medicaid, the Older Americans Act, skilled nursing facilities/nursing homes, and/or state-funded programs. The effort is coordinated by the National Association of States United for Aging and Disabilities¹ (NASUAD) and Human Services Research Institute (HSRI). Data for the project are gathered through a yearly in-person Adult Consumer Survey administered by state Aging, Disability, and Medicaid Agencies to a sample of at least 400 individuals. Indicators address key areas of concern such as service and care coordination, community participation, choice and decision making, employment, rights and respect, health care and safety. NCI-AD data measure the performance of state long term services and supports (LTSS) systems and help state agencies with quality improvement initiatives, strategic planning, and legislative and funding prioritization. The project officially launched in mid-2015 with 13 participating states². For more on the development and history of NCI-AD, refer to the *National Core Indicators Aging and Disability Adult Consumer Survey Mid-Year Results 2015-2016: Shortened Data Collection Cycle*.

NCI-AD Survey

Survey Overview

The NCI-AD Adult Consumer Survey is designed to measure approximately 50 core indicators. Indicators are the standard measures used across states to assess the outcomes of services provided to individuals. Indicators are organized across eighteen broader domains and address key areas of concern, including employment, respect/rights, service coordination, care coordination, choice,

¹ NASUAD is the membership organization for state Aging, Disability, and Medicaid directors.

² Colorado, Delaware, Georgia, Indiana, Kansas, Maine, Minnesota, Mississippi, New Jersey, North Carolina, Ohio, Tennessee, and Texas.

and health and safety. An example of an indicator around Service Coordination is: “Proportion of people who receive the services that they need.”

While most indicators correspond to a single survey question, a few refer to clusters of related questions. For example, the Access indicator that measures “Proportion of people who get needed equipment, assistive devices” is measured by several survey questions that ask about the person’s need for various equipment and devices. The following Figure 1 details NCI-AD domains and corresponding indicators.

Figure 1. NCI-AD Domains and indicators

Domain	NCI-AD Indicator
Community Participation	Proportion of people who are able to participate in preferred activities outside of home when and with whom they want
Choice and Decision Making	Proportion of people who are involved in making decisions about their everyday lives including where they live, what they do during the day, the staff that supports them and with whom they spend time
Relationships	Proportion of people who are able to see or talk to their friends and families when they want to
	Proportion of people who are (not) lonely
Satisfaction	Proportion of people who are satisfied with where they live
	Proportion of people who are satisfied with what they do during the day
	Proportion of people who are satisfied with staff who work with them
Service Coordination	Proportion of people who know who to call with a complaint, concern, or question about their services
	Proportion of people whose CM talks to them about any needs that are not being met
	Proportion of people who can get in contact with their CM when they need to
	Proportion of people who receive the services that they need
	Proportion of people finding out about services from service agencies
	Proportion of people who want help planning for future need for services

Domain	NCI-AD Indicator
	Proportion of people who have an emergency plan in place
	Proportion of people whose support workers come when they are supposed to
	Proportion of people who use a relative as their support person
Care Coordination	Proportion of people discharged from the hospital or LTC facility who felt comfortable going home
	Proportion of people making a transition from hospital or LTC facility who had adequate follow-up
	Proportion of people who know how to manage their chronic conditions
Access	Proportion of people who have adequate transportation
	Proportion of people who get needed equipment, assistive devices (wheelchairs, grab bars, home modifications, etc.)
	Proportion of people who have access to information about services in their preferred language
Safety	Proportion of people who feel safe at home
	Proportion of people who feel safe around their staff/ caregiver
	Proportion of people who feel that their belongings are safe
	Proportion of people whose fear of falling is managed
	Proportion of people who are able to get to safety quickly in case of an emergency
Health Care	Proportion of people who have been to the ER in the past 12 months
	Proportion of people who have had needed health screenings and vaccinations in a timely manner (e.g., vision, hearing, dental, etc.)
	Proportion of people who can get an appointment their doctor when they need to
	The proportion of people who have access to mental health services when they need them
Wellness	The proportion of people in poor health
	Proportion of people with unaddressed memory concerns
Medications	Proportion of people taking medications that help them feel less sad/depressed
	Proportion of people who know what their medications are for
Rights and Respect	Proportion of people whose basic rights are respected by others

Domain	NCI-AD Indicator
	Proportion of people whose staff/worker/caregiver treat them with respect
Self-Direction of Care	Proportion of people self-directing
	Proportion of people who can choose or change the kind of services they receive and who provides them
Work	Proportion of people who have a paid job
	Proportion of people whose job pays at least minimum wage
	Proportion of people who would like a job
	Proportion of people who have had job search assistance
	Proportion of people who volunteer
Everyday Living	Proportion of people who have adequate support to perform activities of daily living (bathing, toileting, taking meds, etc.) and IADLs (cleaning, laundry, etc.)
	Proportion of people who have access to healthy foods
Affordability	Proportion of people who have ever had to cut back on food because of money
Planning for future	Proportion of people who want help planning for future need for services
	Proportion of people who have decision-making assistance
Control	Proportion of people who feel in control of their lives

Organization of the Survey

The NCI-AD Adult Consumer Survey consists of a pre-survey form, a background information section, the in-person interview questions, and an interviewer feedback form. An additional Proxy Version of the survey is available for surveys conducted only with a proxy respondent. Each is described below.

Pre-Survey Information: This form has questions that help the interviewer prepare for the meeting. Pre-Survey information is not received by HSRI, is not analyzed and thus is not included in this report; it is for interviewer use only.

Background Information: This section consists of questions about the consumer’s demographics, residence, and services and supports. Data are generally collected from state records, case managers, or a combination of both; when information is not available or is incomplete, the interviewer is responsible for collecting the missing background items at the end of the interview.

In-person interview questions: This section includes all questions for the full in-person interview. The survey is broken-out into thematic sub-sections with related questions grouped together (e.g., questions about employment are in the same section; questions about the home are in a separate section, etc.). This section is completed one-on-one with the person whenever possible. However, some questions throughout the survey may be answered (or assisted with) by a proxy respondent (e.g. family member or close friend) if the person receiving services is unable to respond or has asked for assistance with responding.

Proxy Version: This version of the survey is used when the person receiving services is unable to complete **any** of the survey or has asked that a proxy complete the survey on their behalf. This version includes only the questions that may be answered by a proxy respondent and has rephrased questions to reflect that questions are about the individual receiving services.

Interviewer Feedback: This form is completed by the interviewer after the interview to record information such as the length and place of the meeting, any problematic questions encountered, and general feedback for the project team.

NCI-AD in Tennessee

As part of the state’s longstanding statutory and programmatic commitment to quality—in particular, customer perceptions of quality, the state of Tennessee implemented NCI-AD to establish a baseline and ongoing survey results that could be used to evaluate customer satisfaction and program improvement in a standardized manner. In addition, the state wanted to be able to measure program performance in comparison to other states operating similar programs. NCI-AD is the only known survey that is standardized across the country and utilized in multiple states in a consistent manner.

TennCare plans to use these data to aid in understanding the quality of long-terms services and supports (LTSS) provided in Tennessee based on the member’s experience, including how well outcomes are being achieved by the members who are served by

the state-contracted Managed Care Organizations (MCOs). TennCare will also use the data to determine corrective action that may be needed to address MCO performance and to help identify areas the state may need to focus on for program improvements. Finally, TennCare will use the data to compare program performance on a national level in an effort to set benchmarks for service initiatives, continually improving the quality of services provided to Tennessee residents receiving LTSS through TennCare.

Tennessee's participation in NCI-AD was funded through Medicaid administrative funds. The Bureau of TennCare (part of the Division of Health Care Finance and Administration, Tennessee's state Medicaid agency) served as the project lead. The state plans to participate in future cycles of data collection.

Sample

The total number of NCI-AD Adult Consumer Surveys conducted in Tennessee and included for analysis in 2015-2016 was 923 (Total N=923). One program was included in the survey sample (TennCare CHOICES), with three participating MCOs represented (United HealthCare Community Plan, BlueCare and Amerigroup).

TennCare Choices in LTSS ("CHOICES") is a managed long-term services and supports (MLTSS) program, funded through a Medicaid 1115 Demonstration Project. The program includes nursing facility services for residents of all ages and home and community-based services (HCBS) for adults 21 years of age and older with a physical disability and older adults (age 65 and older). HCBS available in the CHOICES program include an array of options that offer hands-on assistance with activities of daily living or instrumental activities of daily living, including personal care visits, attendant care, adult day care and home-delivered meals; the use of technology to help ensure safety and increase independence, such as personal emergency response systems, assistive technology, and minor home modifications; caregiver supports such as respite; pest control; and a variety of community-based residential alternatives for people who are no longer able to live alone and need more intensive support to continue living in the community. Consumer direction, using an employer authority model, is available for certain services, allowing members who elect this option more choice and control over the workers that provide their support.

Tennessee requested that their data be reported in this report by MCO and by CHOICES “Group”. Three MCOs are included in the data: United HealthCare Community Plan, BlueCare and Amerigroup. Each MCO served participants in all three CHOICES Groups:

- Group 1– Members of any age who meet the NF level of care.
- Group 2 – Members who meet the level of care criteria to qualify for NF admission, but choose to receive HCBS in community settings, such as their own homes.
- Group 3 – Members who do not meet the level of care criteria for NF admission, but are at risk of NF placement if needed HCBS are not in place, and qualify for a smaller package of HCBS.

Figure 2 below summarizes the MCOs and Groups included in Tennessee’s analysis sample, the number of surveys completed per MCO and Group and included for analysis, and the number of participants eligible to be included in the survey by MCO and Group. Also included are calculations of margin of error for each MCO/Group estimate under two scenarios: assuming 0.5 distribution of responses and assuming 0.7 distribution of responses. Using the 0.5 distribution of responses is the most conservative assumption one can make when calculating margins of error and is usually used when no prior information is available at all about population proportions. When prior evidence exists about likely distributions of proportions or averages in the population, those proportions can be used in calculating somewhat less conservative margins of error. Based on the data collected so far (including evidence from the large-scale pilot conducted during development phase of the NCI-AD Adult Consumer Survey), it is reasonable to assume a less conservative population proportion (response distribution) of 0.7 when calculating margins of error for the individual MCO/Group. Resulting margins of error are shown under both assumptions. Both scenarios use all completed analyzed surveys as sample MCO/Group N in the calculations. Readers should be cautioned that for some survey items, the actual number of valid responses may be smaller than the number of completed surveys. This is explained in more detail in the following section “Organization of Results”.

Figure 2. MCOs and Groups included, number of surveys, and margins of error

MCO/Group	Number of surveys	Number of eligible participants	Margin of error and confidence level for estimate (using 0.5 distribution)	Margin of error and confidence level for estimate (using 0.7 distribution)
United HealthCare Group 1	77	7432	95% Confidence Level, 11.1% Margin of Error	95% Confidence Level, 10.2 Margin of Error
United HealthCare Group 2	120	3761	95% Confidence Level, 8.8% Margin of Error	95% Confidence Level, 8.1% Margin of Error
United HealthCare Group 3	105	2165	95% Confidence Level, 9.3% Margin of Error	95% Confidence Level, 8.6% Margin of Error
BlueCare Group 1	102	5623	95% Confidence Level, 9.6% Margin of Error	95% Confidence Level, 8.8% Margin of Error
BlueCare Group 2	101	2896	95% Confidence Level, 9.6% Margin of Error	95% Confidence Level, 8.8% Margin of Error
BlueCare Group 3	107	1620	95% Confidence Level, 9.2% Margin of Error	95% Confidence Level, 8.4% Margin of Error
Amerigroup Group 1	134	4316	95% Confidence Level, 8.3% Margin of Error	95% Confidence Level, 7.6% Margin of Error
Amerigroup Group 2	82	1729	95% Confidence Level, 10.6% Margin of Error	95% Confidence Level, 9.7% Margin of Error
Amerigroup Group 3	76	1117	95% Confidence Level, 10.9% Margin of Error	95% Confidence Level, 10.0% Margin of Error
Total	923³	30659		

³ MCO/Group was missing from the survey submission for 19 cases.

Survey Process

NCI-AD Interviews in Tennessee were conducted by Tennessee's nine Area Agencies on Aging and Disability (AAAD) through an existing contract which encompasses a number of single point of entry and quality-related functions for the CHOICES program. Activities for this survey aligned with the existing contract between TennCare and each AAAD, which had previously included conducting face-to-face surveys using a different quality of life instrument. Approximately 34 interviewers were utilized to conduct the survey. The interviewers participated in one of two interviewer trainings, held on August 4-5 and August 6-7, 2015. The training consisted of a detailed review of the NCI-AD survey tool, general and population-specific surveying techniques, procedures for scheduling interviews and obtaining written consent, overview of the NCI-AD project, guidance for follow-up in the case of unmet needs and/or abuse, neglect or exploitation, and data entry procedures. Interviews started on September 1, 2015 and ended December 31, 2015.

Individuals were initially contacted by the interviewer via telephone. During the initial contact, the interviewer obtained verbal consent. During the survey, the interviewer obtained written consent from the interviewee. Tennessee does not require a formal IRB review to participate in a survey of this nature.

Stakeholders

Extensive participant education processes were not necessary in Tennessee, as the survey procedures were not new to CHOICES members. Prior to NCI-AD, TennCare conducted annual CHOICES consumer satisfaction surveys based largely on the Participant Experience Survey. The AAADs conducted the surveys previously described and were well versed in communicating with the population and building trust.

The state opted not to share the sample list with MCO staff who conduct CHOICES care coordination (i.e., case management) functions in order to protect the integrity of the process and ensure members were not coached on how to respond.

Stakeholder groups engaged in preparation and during the NCI-AD interviewing process included the MCOs, AAADs, Tennessee advocacy organizations, nursing facilities, community-based residential providers. Information was provided to stakeholders through the CHOICES Advisory Committee meetings conducted by each MCO and the AAAD quarterly meetings. Advocacy organizations and provider associations, including nursing facility and HCBS, were informed via written communication that was distributed through established email groups. Additionally, a memo was sent to CHOICES nursing facilities and community-based residential providers regarding the possibility that a member supported by their agency may be contacted for an interview.

TennCare will share this report with stakeholder group, convene discussions regarding the results, and use these data to help identify and implement program and performance improvements that will positively impact the quality of services provided to Tennessee residents receiving LTSS through TennCare and their quality of life in the community.

Organization of Results

The following section of the report presents findings from Tennessee's 2015-16 NCI-AD data collection cycle. Results are grouped by MCO/Group and are presented in chart format. Charts show collapsed data broken out by each of the nine MCO/Groups included in the sample, as well as the Tennessee state average. The number of respondents for each MCO/Group and the state as a whole is also shown. For rules on collapsing response options, please refer to Appendix A.

The Ns (number of respondents for each individual MCO/Group and the state) shown in each chart is the number of valid responses to that survey item. That number may be smaller than the total number of completed surveys for a number of reasons:

- Certain questions in the survey could only be asked of the target interviewee – i.e. no proxy respondents were allowed for those questions. As the number of completed surveys includes both the full in-person surveys and the proxy surveys, these questions were only asked in the full in-person survey and thus have a smaller number of respondents.
- Only valid responses were included in both denominator and numerator. The Ns also represent the number of valid responses only. Unclear, refused and, unless otherwise stated, “don't know” responses were excluded.

- The survey contains a number of skip logic patterns. This means that depending on the response to a previous survey item, a question may or may not be asked, as appropriate. When a question is skipped due to survey logic, that particular respondent does not contribute to the calculations for the item and does not contribute to the N.

Tennessee state average is a weighted state estimate. A weighted estimate is needed because Tennessee proportionally oversampled some of its MCOs and Groups – i.e. some MCOs/Groups constituted a larger proportion of the sample than they did as proportion of population receiving services. To account for these MCOs/Groups being proportionally over-represented in the state sample, statistical weights were developed and applied when estimating state averages. Applying these weights in effect “re-balances” the disproportionate representation of MCOs/Groups in the sample, and results in a state estimate that one would expect if they were sampled proportionately to the populations they serve. For exact calculations of state weights please contact the project team.

Un-collapsed data showing all categories of responses by MCO/Group and the sample overall are shown in tabular format in Appendix B. Please note that the “sample average” in Appendix B is a simple average and is different from the state average, as it presents unweighted data (i.e. no weights that account for disproportionate sampling of MCOs/Groups have been applied).

Limitations of Data

This report contains survey results related to the quality and impact of LTSS in Tennessee. However, benchmarks for acceptable or unacceptable levels of performance for the programs or the state overall are not included. Rather, it is up to stakeholders to assess the information contained in this report and draw conclusions. This report is intended to be one mechanism for State leaders and community stakeholders to assess the current state of LTSS system and identify areas that are working well, and areas that could use improvement. The results charts throughout this report display MCO/Group scores relative to one another and to Tennessee weighted state average. It is up to public managers, policy-makers, and other stakeholders to decide whether an MCO/Group’s result relative to the state average suggests that changes or further investigation are necessary. Also, by aligning NCI-AD measures

with specific state and federal initiatives, Tennessee can more accurately reflect the areas in which transformation is evident and continue to promote efforts accordingly, while recognizing limitations and ongoing challenges.

Extreme caution should be exercised when interpreting results where the sample size is small. The sample sizes for each MCO/Group are shown in each chart and table. Anytime the sample size is smaller than 20, the N is also asterisked. Readers should be very careful interpreting results based on small Ns; in fact, no conclusions should be drawn – instead, the reader should treat the data as suggestive and informational only.

Community Participation

People are able to participate in preferred activities outside of home when and with whom they want.

There is one Community Participation indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who are able to participate in preferred activities outside of home when and with whom they want.

There are two survey items that correspond to the Community Participation domain.

Un-collapsed data for state and MCO/Groups are shown in Appendix B.

Graph 1. Proportion of people who are able to do things they enjoy outside of their home when and with whom they want to.

Choice and Decision Making

People are involved in making decisions about their everyday lives and with whom they spend their time.

There is one Choice and Decision Making indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who are involved in making decisions about their everyday lives including where they live, what they do during the day, the staff that supports them and with whom they spend time

There are four survey items that correspond to the Choice and Decision Making domain.

Un-collapsed data for state and MCOs/Groups are shown in Appendix B.

Graph 2. Proportion of people who are able to choose their roommate (if in group setting)

* Very small number of responses

Graph 3. Proportion of people who get up and go to bed at the time when they want

Graph 4. Proportion of people who can eat their meals when they want

Graph 5. Proportion of people who are able to decide how to furnish and decorate their room (if in group setting)

* Very small number of responses

Relationships

People have friends and relationships and do not feel lonely.

There are two Relationship indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who are able to see or talk to their friends and families when they want to.
2. Proportion of people who are (not) lonely.

There are three survey items that correspond to the Relationship domain.

Un-collapsed data for state and MCOs/Groups are shown in Appendix B.

Graph 6. Proportion of people who can always or almost always see or talk to friends and family when they want to (if there are friends and family who do not live with person)

Graph 7. Proportion of people who sometimes or often feel lonely, sad or depressed

Satisfaction

People are satisfied with their everyday lives – where they live, who works with them, and what they do during the day.

There are three Satisfaction indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who are satisfied with where they live.
2. Proportion of people who are satisfied with what they do during the day.
3. Proportion of people who are satisfied with staff who work with them.

There are seven survey items that correspond to the Satisfaction domain.

Un-collapsed data for state and MCOs/Groups are shown in Appendix B.

Graph 8. Proportion of people who like where they are living

Graph 9. Proportion of people who would prefer to live somewhere else

Graph 10. Proportion of people who like how they usually spend their time during the day

Graph 11. Proportion of people whose paid support staff change too often

Graph 12. Proportion of people whose paid support staff do things the way they want them done

Service Coordination

Service coordinators are accessible, responsive, and support the person's participation in service planning and the person receives needed services.

There are nine Service Coordination indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who know who to call with a complaint, concern, or question about their services
2. Proportion of people whose CM talks to them about any needs that are not being met
3. Proportion of people who can get in contact with their CM when they need to
4. Proportion of people who receive the services that they need
5. Proportion of people finding out about services from service agencies⁴
6. Proportion of people who want help planning for future need for services
7. Proportion of people who have an emergency plan in place
8. Proportion of people whose support workers come when they are supposed to
9. Proportion of people who use a relative as their support person

There are thirteen survey items that correspond to the Service Coordination domain.

Un-collapsed data for state and MCOs/Groups are shown in Appendix B.

⁴ Data shown in Appendix B only

Graph 13. Proportion of people who know whom to call if they have a complaint about their services

Graph 14. Proportion of people who know whom to call to get information if their needs change and they need new or different types of services and supports

Graph 15. Proportion of people who can reach their case manager/care coordinator when they need to (if know they have case manager/care coordinator)

Graph 16. Proportion of people whose paid support staff show up and leave when they are supposed to

Graph 17. Proportion of people who have an emergency plan in place

Graph 18. Proportion of people who want help planning for their future need for services

Graph 19. Proportion of people whose services meet all their needs and goals

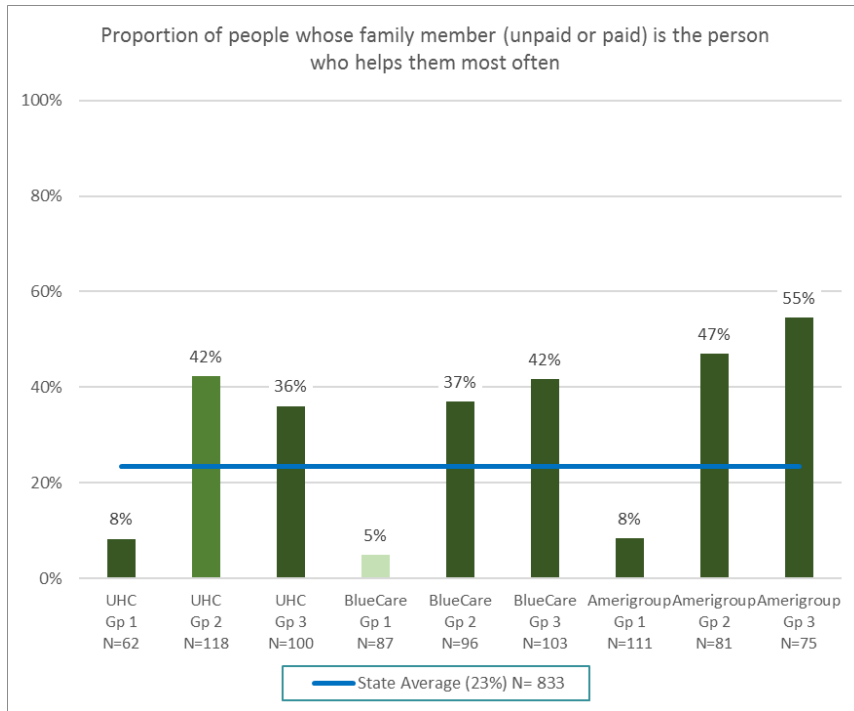

Graph 20. Proportion of people whose case manager/care coordinator talked to them about services that might help with unmet needs and goals (if have case manager and have unmet needs and goals)

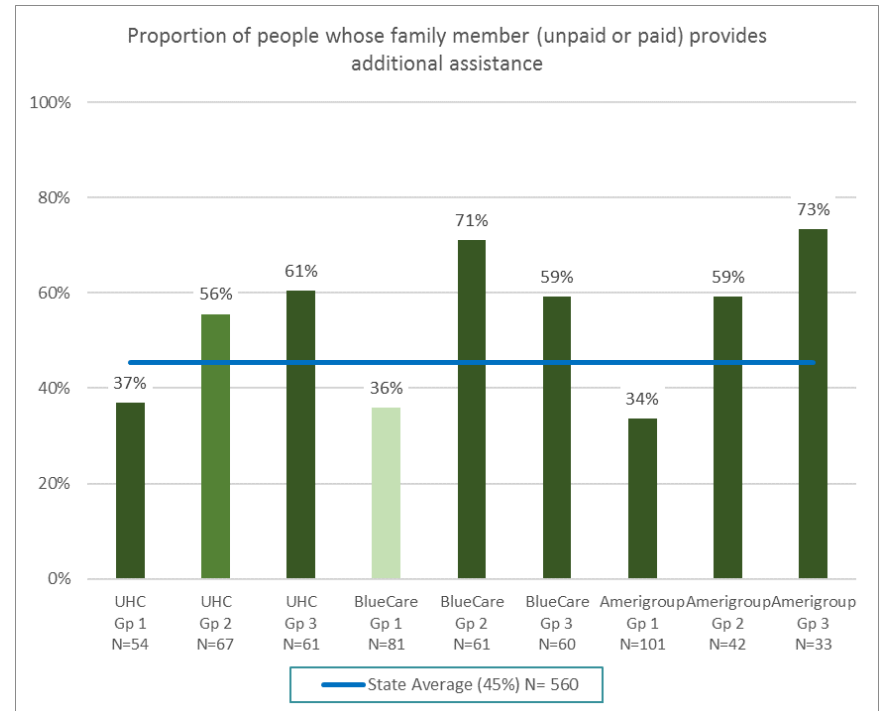

* Very small number of responses

Graph 21. Proportion of people whose family member (unpaid or paid) is the person who helps them most often

Graph 22. Proportion of people whose family member (unpaid or paid) provides additional assistance

Care Coordination

Individuals are provided appropriate coordination of care.

There are three Care Coordination indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people discharged from the hospital or LTC facility who felt comfortable going home.
2. Proportion of people making a transition from hospital or LTC facility who had adequate follow-up.
3. Proportion of people who know how to manage their chronic conditions.

There are five survey items that correspond to the Care Coordination domain.

Un-collapsed data for state and MCOs/Groups are shown in Appendix B.

Graph 23. Proportion of people who stayed overnight in a hospital or rehabilitation facility (and were discharged to go home) in past year

Graph 24. Proportion of people who reported feeling comfortable and supported enough to go home after being discharged from a hospital or rehabilitation facility (if occurred in the past year)

Graph 25. Proportion of people who reported someone followed-up with them after discharge from a hospital or rehabilitation facility (if occurred in the past year)

Graph 26. Proportion of people who reported having one or more chronic condition(s)

Graph 27. Proportion of people who reported they know how to manage their chronic condition(s)

Access

Publicly funded services are readily available to individuals who need and qualify for them.

There are three Access indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have adequate transportation.
2. Proportion of people who get needed equipment, assistive devices (wheelchairs, grab bars, home modifications, etc.)
3. Proportion of people who have access to information about services in their preferred language.

There are five survey items that correspond to the Access domain.

Un-collapsed data for state and MCOs/Groups are shown in Appendix B.

Graph 28. Proportion of people who have transportation when they want to do things outside of their home

Graph 29. Proportion of people who have transportation to get to medical appointments when they need to

Graph 30. Proportion of people who receive information about their services in the language they prefer (if non-English)

* Very small number of responses

Graph 31. Proportion of people who need new grab bars in the bathroom or elsewhere in home

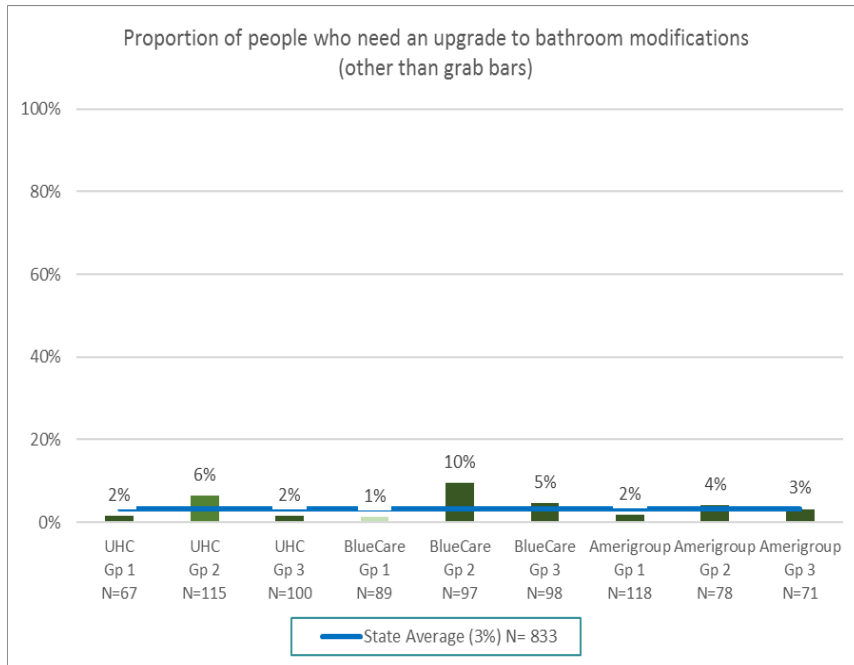

Graph 32. Proportion of people who need an upgrade to grab bars in the bathroom or elsewhere in home

Graph 33. Proportion of people who need new bathroom modifications (other than grab bars)

Graph 34. Proportion of people who need an upgrade to bathroom modifications (other than grab bars)

Graph 35. Proportion of people who need a new specialized bed

Graph 36. Proportion of people who need an upgrade to specialized bed

Graph 37. Proportion of people who need a new ramp or stair lift in or outside the home

Graph 38. Proportion of people who need an upgrade to a ramp or stair lift in or outside the home

Graph 39. Proportion of people who need a new remote monitoring system

Graph 40. Proportion of people who need an upgrade to remote monitoring system

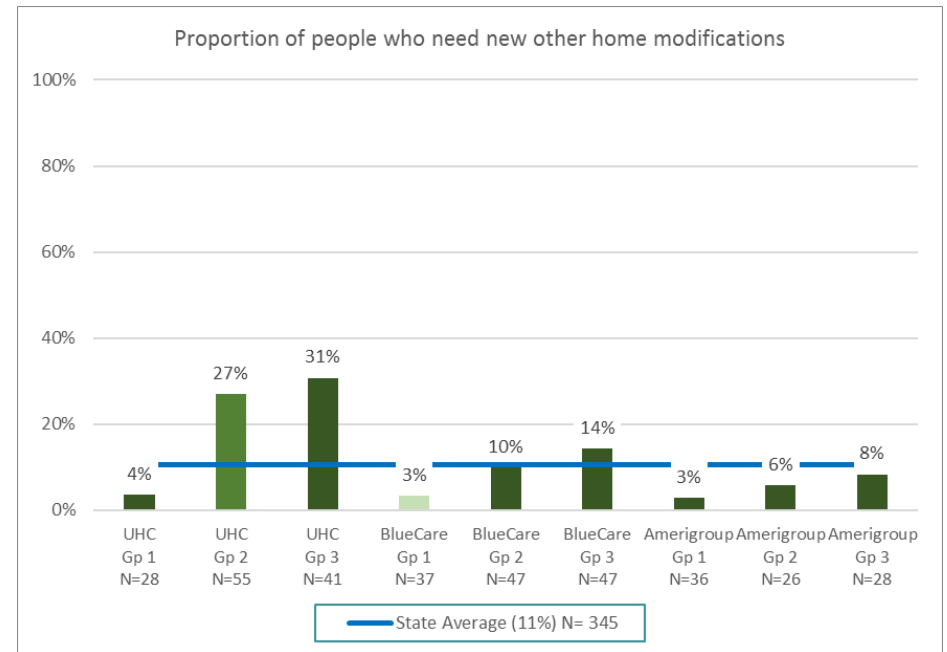

Graph 41. Proportion of people who need a new emergency response system

Graph 42. Proportion of people who need an upgrade to emergency response system

Graph 43. Proportion of people who need new other home modifications

Graph 44. Proportion of people who need an upgrade to other home modifications

Graph 45. Proportion of people who need a new walker

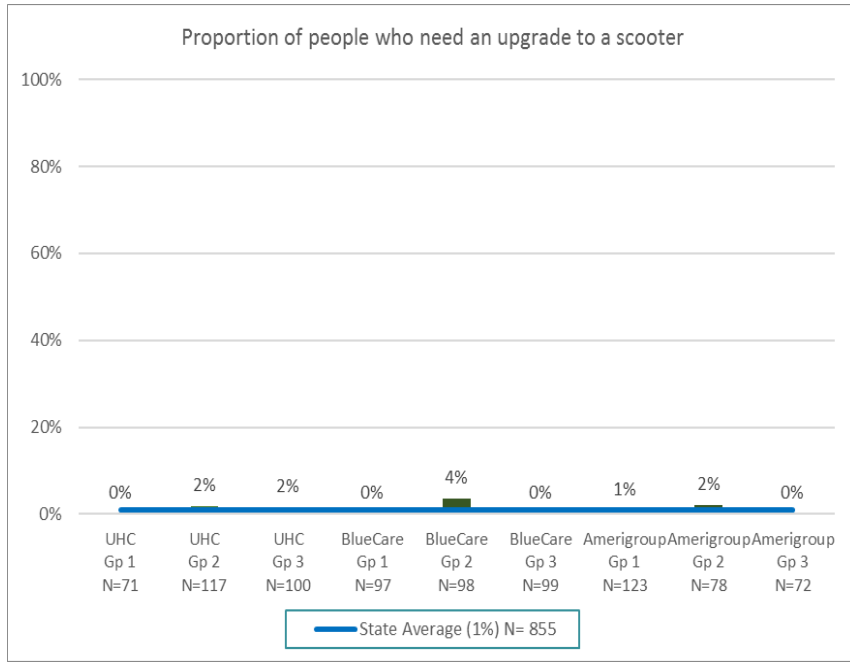

Graph 46. Proportion of people who need an upgrade to a walker

Graph 47. Proportion of people who need a new scooter

Graph 48. Proportion of people who need an upgrade to a scooter

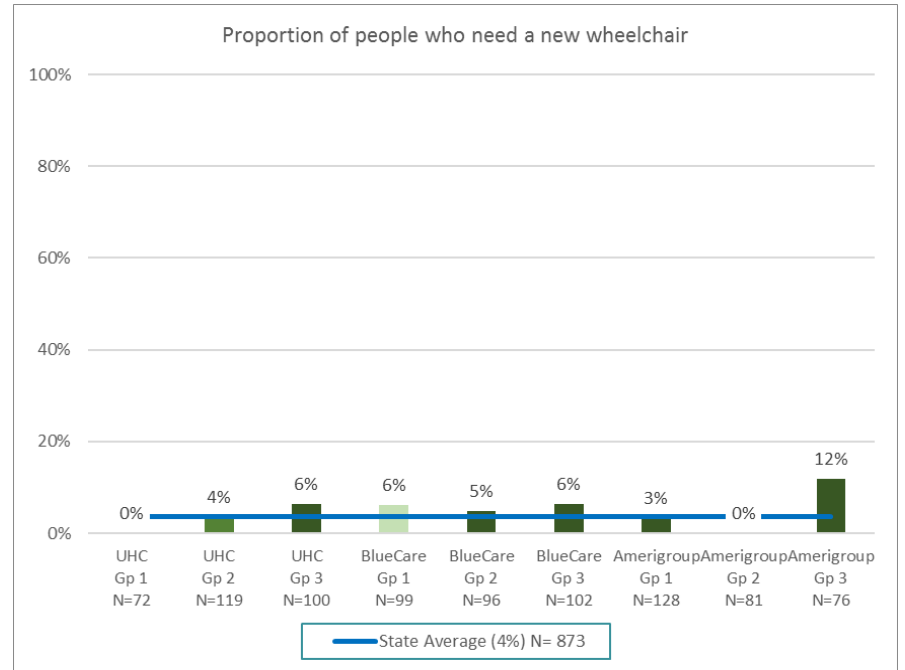

Graph 49. Proportion of people who need a new cane

Graph 50. Proportion of people who need an upgrade to cane

Graph 51. Proportion of people who need a new wheelchair

Graph 52. Proportion of people who need an upgrade to a wheelchair

Graph 53. Proportion of people who need new hearing aids

Graph 54. Proportion of people who need an upgrade to hearing aids

Graph 55. Proportion of people who need new glasses

Graph 56. Proportion of people who need an upgrade to glasses

Graph 57. Proportion of people who need a new communication device

Graph 58. Proportion of people who need an upgrade to a communication device

Graph 59. Proportion of people who need new portable oxygen

Graph 60. Proportion of people who need an upgrade to portable oxygen

Graph 61. Proportion of people who need new other assistive device

Graph 62. Proportion of people who need an upgrade to other assistive device

Safety

People feel safe from abuse, neglect, and injury.

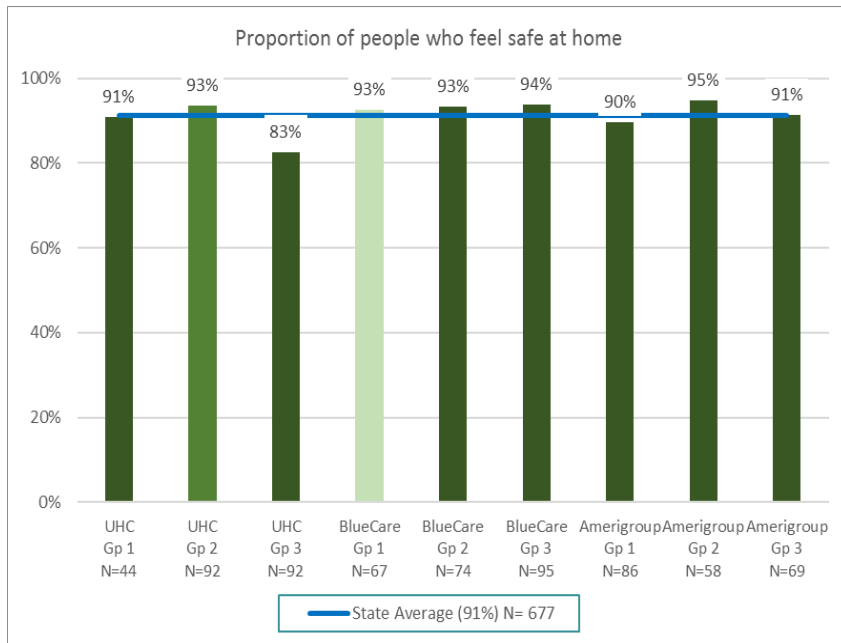

There are five Safety indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who feel safe at home.
2. Proportion of people who feel safe around their staff/ caregiver.
3. Proportion of people who feel that their belongings are safe.
4. Proportion of people whose fear of falling is managed.
5. Proportion of people who are able to get to safety quickly in case of an emergency.

There are seven survey items that correspond to the Safety domain.

Un-collapsed data for state and MCOs/Groups are shown in Appendix B.

Graph 63. Proportion of people who feel safe at home

Graph 64. Proportion of people who feel safe around their paid support staff

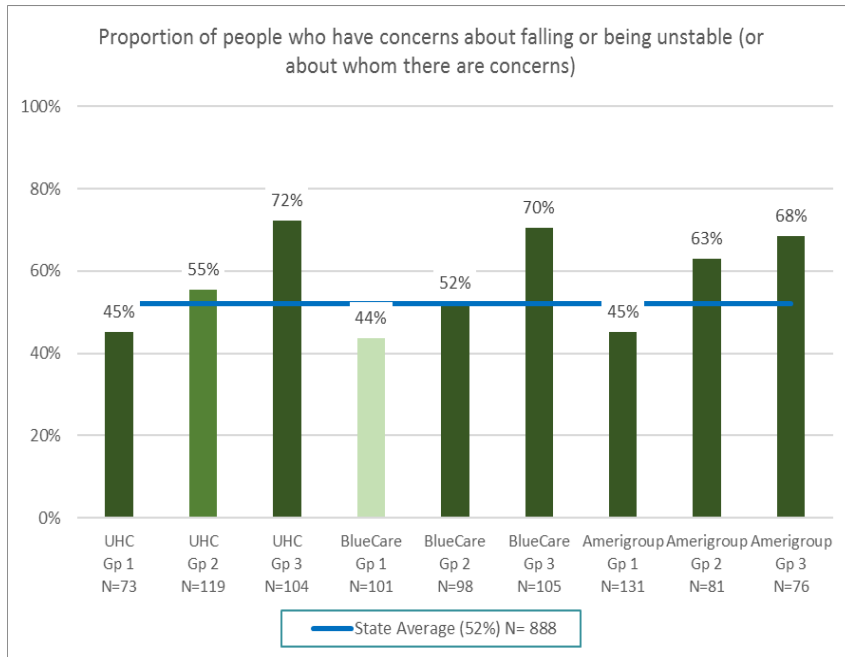

Graph 65. Proportion of people who are ever worried for the security of their personal belongings

Graph 66. Proportion of people whose money was taken or used without their permission

Graph 67. Proportion of people who have concerns about falling or being unstable (or about whom there are concerns)

Graph 68. Proportion of people with whom somebody talked to or worked with to reduce risk of falling or being unstable (if there are such concerns)

Graph 69. Proportion of people who are able to get to safety quickly in case of an emergency like a fire or a natural disaster

Health Care

People secure needed health services.

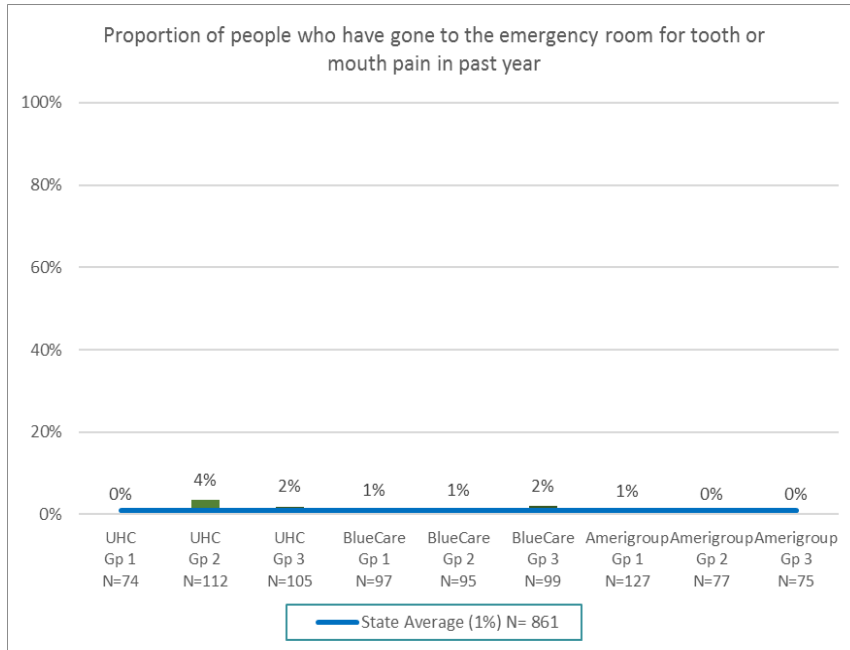

There are four Health Care indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have been to the ER in the past 12 months.
2. Proportion of people who have had needed health screenings and vaccinations in a timely manner (e.g., vision, hearing, dental, etc.)
3. Proportion of people who can get an appointment their doctor when they need to.
4. The proportion of people who have access to mental health services when they need them.

There are twelve survey items that correspond to the Health Care domain.

Un-collapsed data for state and MCOs/Groups are shown in Appendix B.

Graph 70. Proportion of people who have gone to the emergency room for tooth or mouth pain in past year

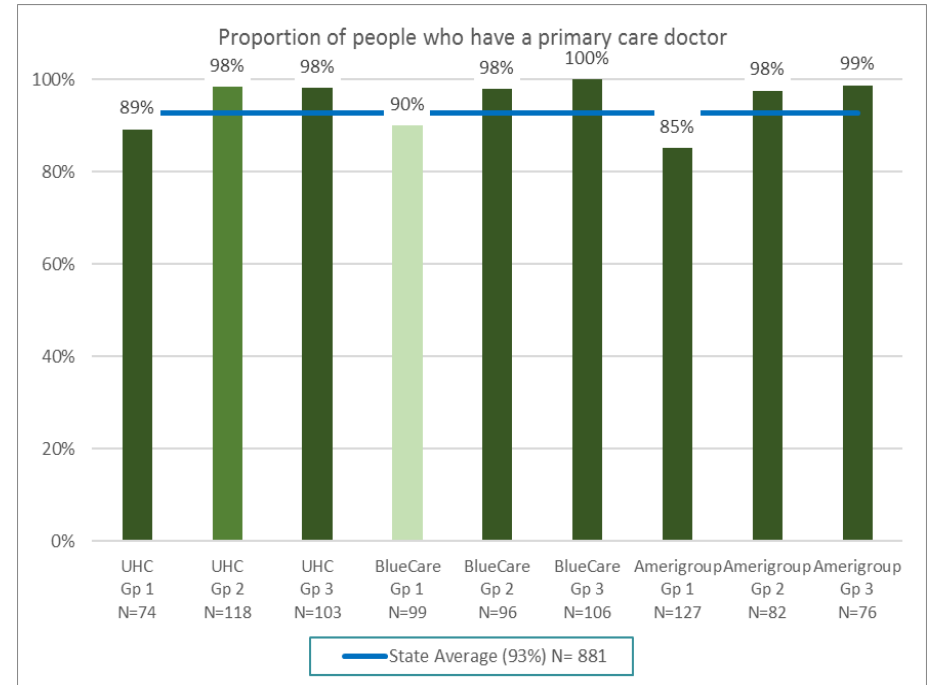

Graph 71. Proportion of people who have gone to the emergency room for falling or losing balance in past year

Graph 72. Proportion of people who have gone to the emergency room in past year (for reasons other than tooth/mouth pain or falling/losing balance)

Graph 73. Proportion of people who have a primary care doctor

Graph 74. Proportion of people who can get an appointment to see their primary care doctor when they need to

Graph 75. Proportion of people who have talked to someone about feeling sad and depressed during the past 12 months (if feeling sad and depressed)

Graph 76. Proportion of people who have had a physical exam or wellness visit in the past year

Graph 77. Proportion of people who have had a hearing exam in the past year

Graph 78. Proportion of people who have had a vision exam in the past year

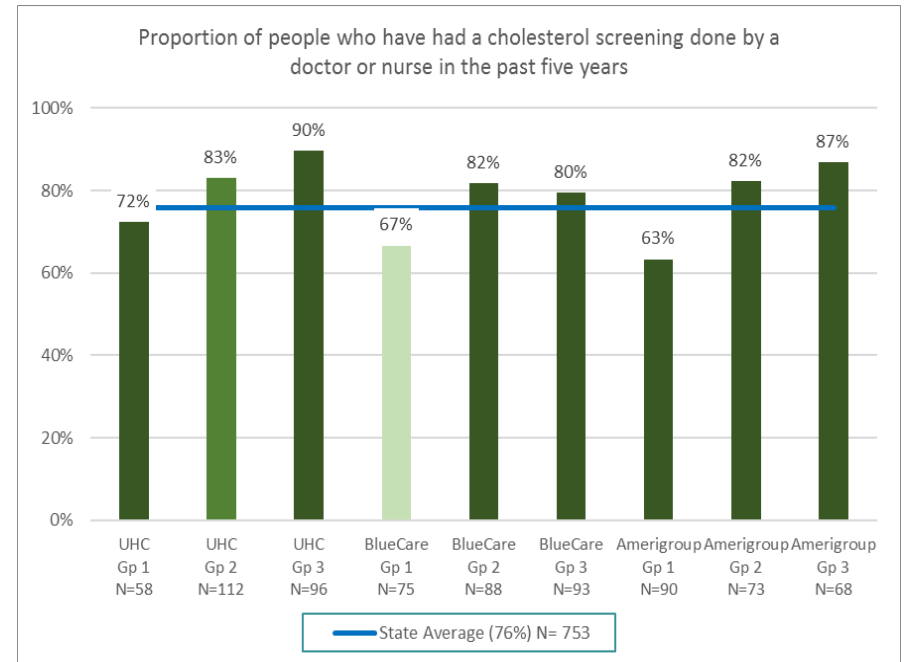

Graph 79. Proportion of people who have had a flu shot in the past year

Graph 80. Proportion of people who have had a routine dental visit in the past year

Graph 81. Proportion of people who have had a cholesterol screening done by a doctor or nurse in the past five years

Wellness

People are supported to maintain health.

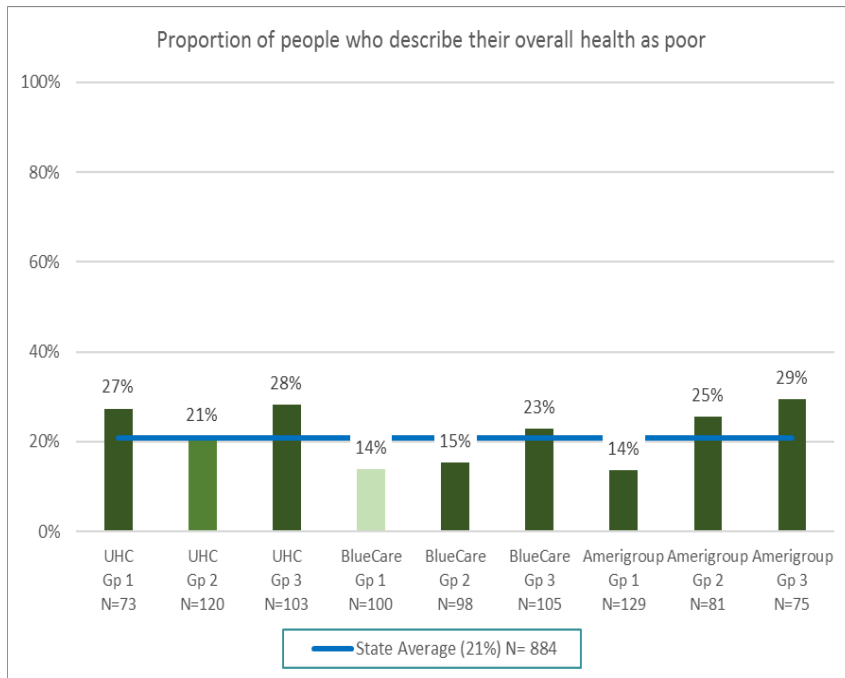

There are two Wellness indicators measured by the NCI-AD Adult Consumer Survey:

1. The proportion of people in poor health.
2. Proportion of people with unaddressed memory concerns.

There are four survey items that correspond to the Wellness domain.

Un-collapsed data for state and MCOs/Groups are shown in Appendix B.

Graph 82. Proportion of people who describe their overall health as poor

Graph 83. Proportion of people who reported their health is much better or somewhat better compared to 12 months ago

Graph 84. Proportion of people who reported they forget things more often than before during the past 12 months

Graph 85. Proportion of people who have discussed (or somebody else discussed) their forgetting things with a doctor or a nurse (if forget things more often during the past 12 months)

Medications

Medications are managed effectively and appropriately.

There are two Medication indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people taking medications that help them feel less sad/depressed.
2. Proportion of people who know what their medications are for.

There are three survey items that correspond to the Medication domain.

Un-collapsed data for state and MCOs/Groups are shown in Appendix B.

Graph 86. Proportion of people who take medications that help them feel less sad or depressed

Graph 87. Proportion of people who take or are supposed to take any prescription medications

Graph 88. Proportion of people who understand why they take their prescription medications and what they are for (if take or are supposed to take prescription medications)

Rights and Respect

People receive the same respect and protections as others in the community.

There are two Rights and Respect indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people whose basic rights are respected by others.
2. Proportion of people whose staff/worker/caregiver treat them with respect.

There are nine survey items that correspond to the Rights and Respect domain.

Un-collapsed data for state and MCOs/Groups are shown in Appendix B.

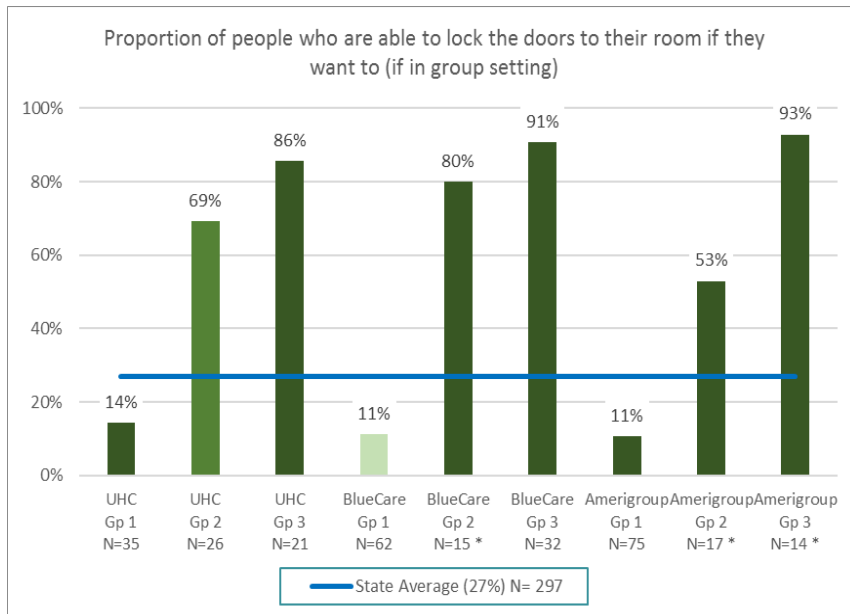

Graph 89. Proportion of people who feel that their paid support staff treat them with respect

Graph 90. Proportion of people who report that others ask permission before entering their home/room

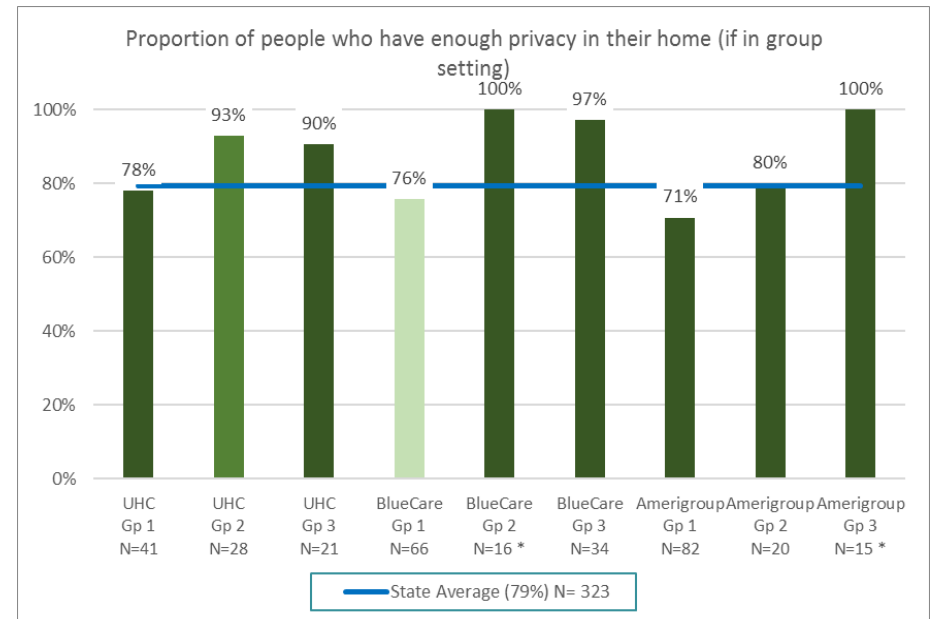

Graph 91. Proportion of people who are able to lock the doors to their room if they want to (if in group setting)

* Very small number of responses

Graph 92. Proportion of people who have enough privacy in their home (if in group setting)

* Very small number of responses

Graph 93. Proportion of people who are able to have visitors come at any time (if in group setting)

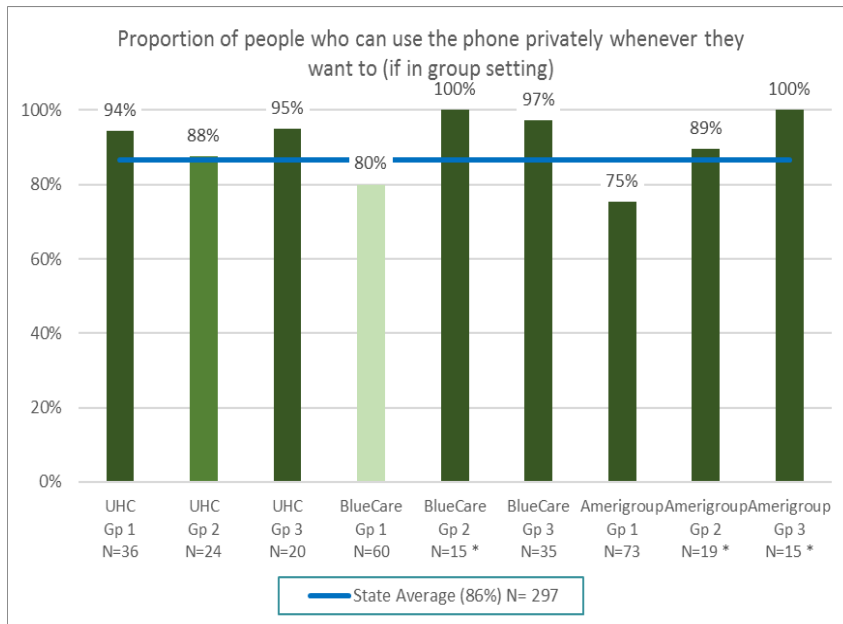

* Very small number of responses

Graph 94. Proportion of people who have privacy with visitors at home if they want it (if in group setting)

* Very small number of responses

Graph 95. Proportion of people who can use the phone privately whenever they want to (if in group setting)

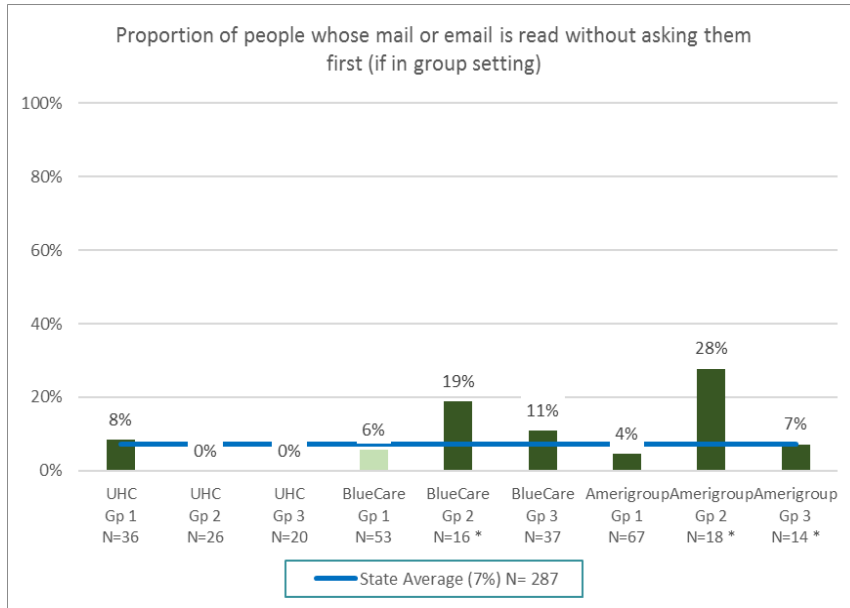

* Very small number of responses

Graph 96. Proportion of people who have access to food at all times of the day (if in group setting)

* Very small number of responses

Graph 97. Proportion of people whose mail or email is read without asking them first (if in group setting)

* Very small number of responses

Self-Direction of Care

People have authority and are supported to direct and manage their own services.

There are two Self-Direction of Care indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people self-directing.
2. Proportion of people who can choose or change the kind of services they receive and who provides them.

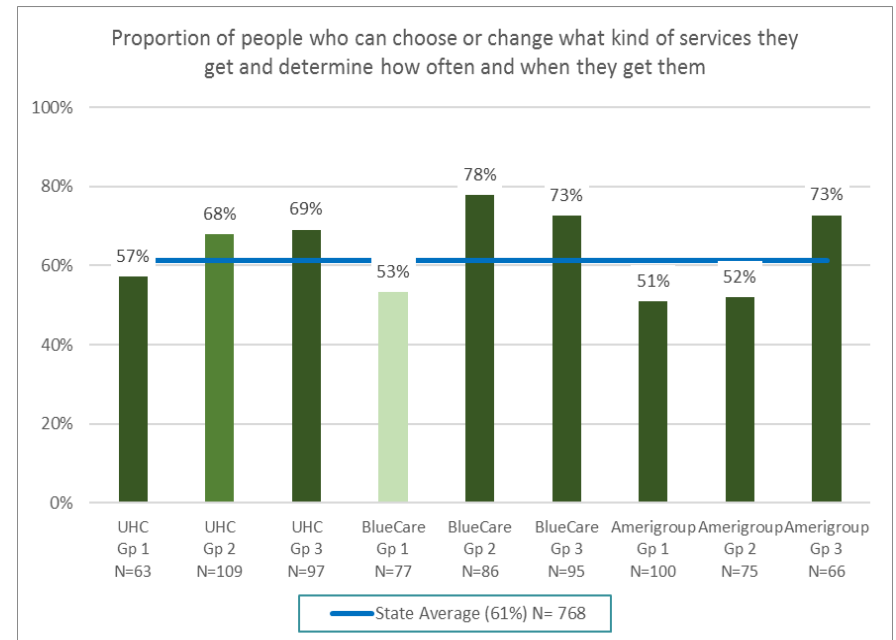

There are three survey items that correspond to the Self-Direction of Care domain. Proportion of people self-directing is derived from state administrative records.

Un-collapsed data for state and MCOs/Groups are shown in Appendix B.

Graph 98. Proportion of people who are participating in a self-directed supports option (as defined by their State—data for this indicator come directly from State administrative records)

Graph 99. Proportion of people who can choose or change what kind of services they get and determine how often and when they get them

Graph 100. Proportion of people who can choose or change who provides their services if they want to

Work

People have support to find and maintain community integrated employment if they want it.

There are five Work indicators measured by the NCI-AD Adult Consumer Survey:

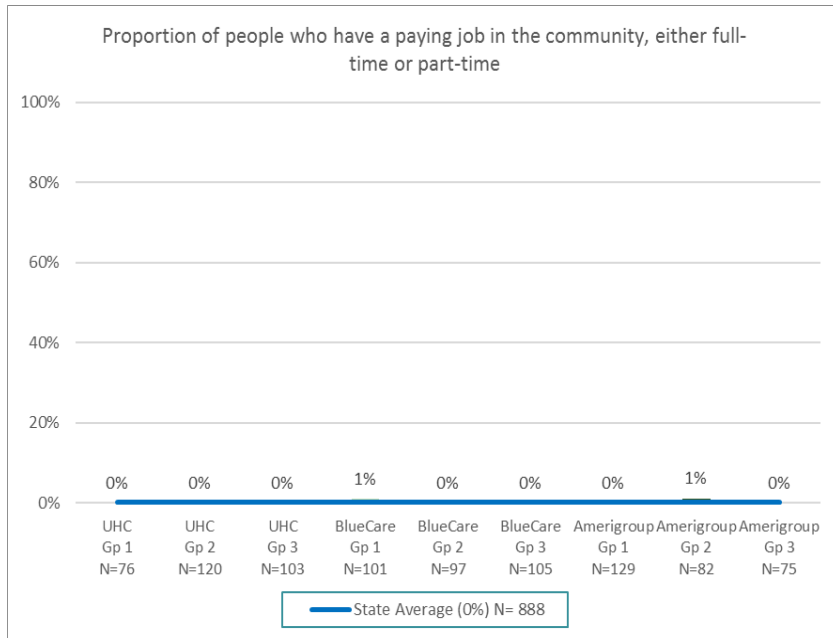

1. Proportion of people who have a paid job.
2. Proportion of people whose job pays at least minimum wage⁵.
3. Proportion of people who would like a job.
4. Proportion of people who have had job search assistance.
5. Proportion of people who volunteer.

There are five survey items that correspond to the Work domain.

Un-collapsed for state and MCOs/Groups are shown in Appendix B.

⁵ Data not shown due to very small numbers

Graph 101. Proportion of people who have a paying job in the community, either full-time or part-time

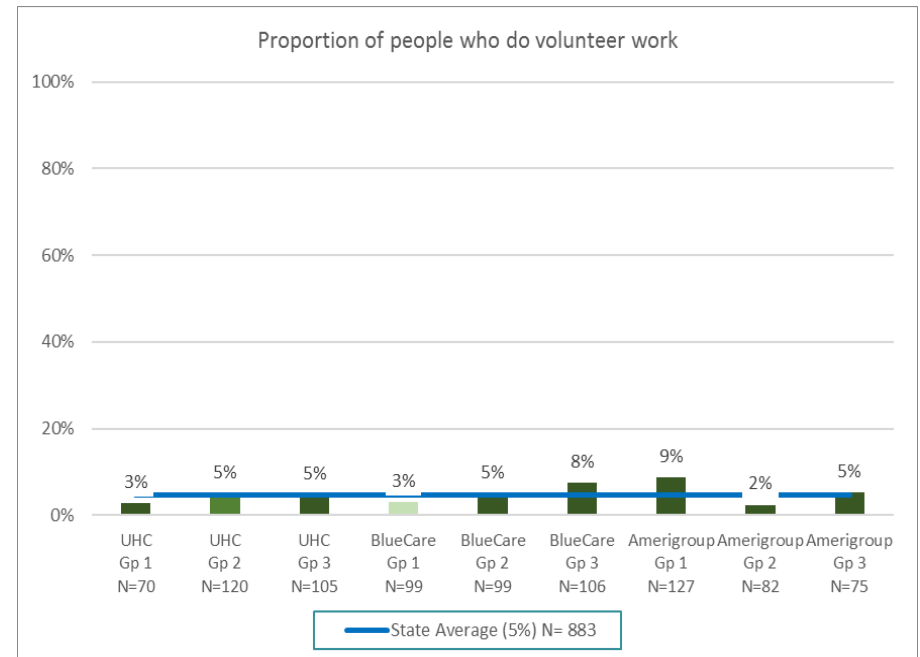

Graph 102. Proportion of people who would like a job (if not currently employed)

Graph 103. Proportion of people who reported that someone has talked to them about job options (if wanted a job)

Graph 104. Proportion of people who do volunteer work

Everyday Living

People have enough supports for everyday living.

There are two Everyday Living indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have adequate support to perform activities of daily living (bathing, toileting, taking meds, etc.) and IADLs (cleaning, laundry, etc.)
2. Proportion of people who have access to healthy foods.

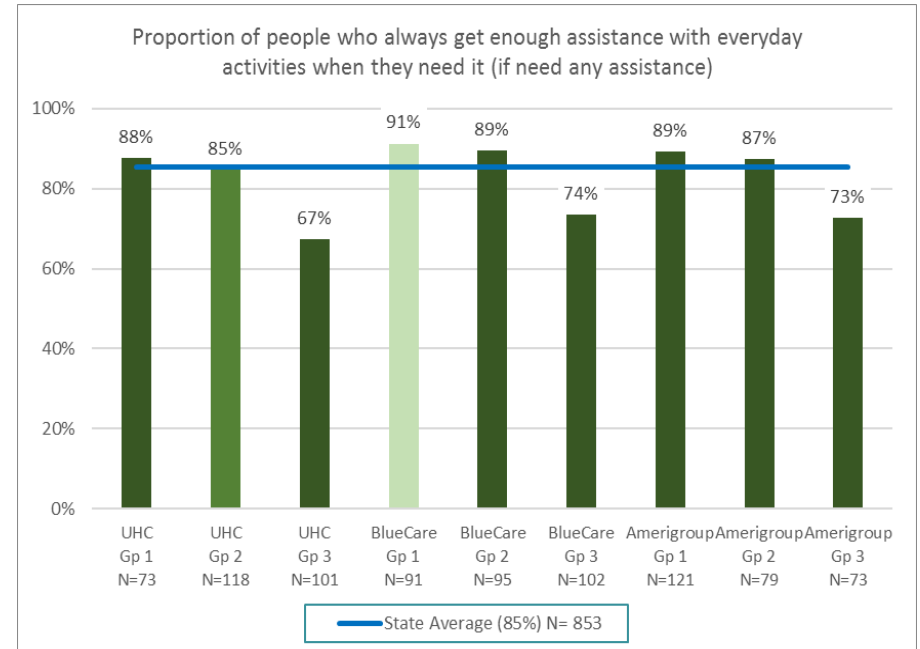

There are five survey items that correspond to the Everyday Living domain.

Un-collapsed data for state and MCOs/Groups are shown in Appendix B.

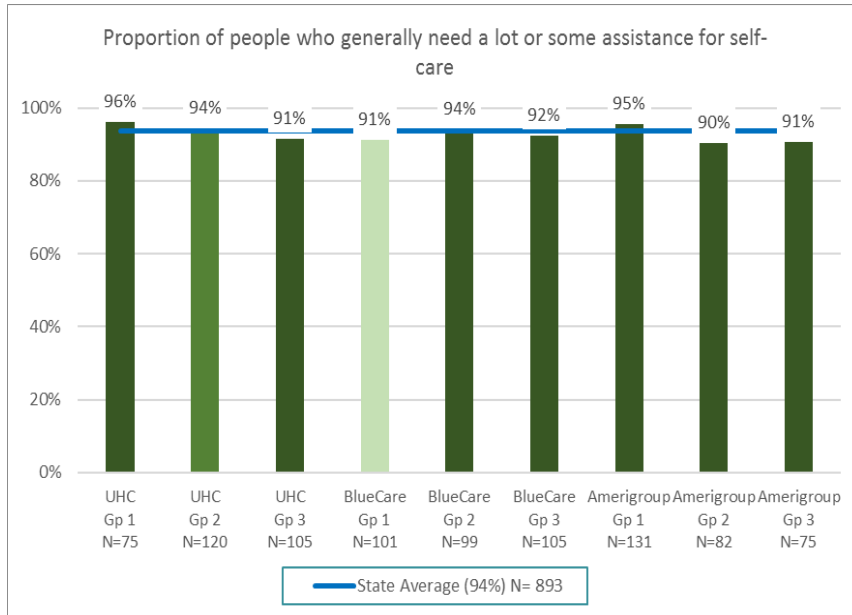

Graph 105. Proportion of people who generally need a lot or some assistance with everyday activities (things like preparing meals, housework, shopping or taking their medications)

Graph 106. Proportion of people who always get enough assistance with everyday activities when they need it (if need any assistance) (things like preparing meals, housework, shopping or taking their medications)

Graph 107. Proportion of people who generally need a lot or some assistance for self-care (things like bathing, dressing, going to the bathroom, eating, or moving around their home)

Graph 108. Proportion of people who always get enough assistance with self-care when they need it (if need any assistance) (things like bathing, dressing, going to the bathroom, eating, or moving around their home)

Graph 109. Proportion of people who have access to healthy foods like fruits and vegetables when they want them

Affordability

People have enough available resources.

There is one Affordability indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have ever had to cut back on food because of money.

There is one survey item that corresponds to the Affordability domain.

Un-collapsed data for state and MCOs/Groups are shown in Appendix B.

Graph 110. Proportion of people who ever have to skip a meal due to financial worries

Planning for future

People have support to plan and make decision about the future.

There are two Planning for Future indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who want help planning for future need for services.
2. Proportion of people who have decision-making assistance.

There are two survey items that correspond to the Planning for Future domain.

Un-collapsed data for state and MCOs/Groups are shown in Appendix B.

Graph 111. Proportion of people who want help planning for their future need for services

Control

People feel in control of their lives

There is one Control indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who feel in control of their lives.

There is one survey item that corresponds to the Control domain.

This section also includes presentation of results on a ranking of what is most important to people surveyed⁶.

Un-collapsed data for state and MCOs/Groups are shown in Appendix B.

⁶ Data shown in Appendix B only

Graph 112. Proportion of people who feel in control of their life

Appendix A

Rules for Recoding and Collapsing Responses

Below is a table that details collapsing and recoding logic for indicators that were measured using anything other than a “Yes/No” binary response. The number in the third column refers to the table number in the report where the indicator can be found. Unless otherwise stated, “don’ know” and “unclear/refused” responses are excluded from both numerator and denominator.

Table A1. Outcome Variables – Collapsing Rules

Domain	Indicator	Graph #	Recoding/Collapsing Logic
Community Participation	Proportion of people who are able to do things they enjoy outside of their home when and with whom they want to	1	Collapse “No” and “Sometimes”
	Proportion of people who get up and go to bed at the time they want	3	Collapse “Some days, sometimes” and “No, never”
Choice and Decision Making	Proportion of people who can eat their meals when they want	4	Collapse “Some days, sometimes” and “No, never”
	Proportion of people who are able to decide how to furnish and decorate their room (if in group setting)	5	Collapse “In-between, able to decide some ways” and “No”
Relationships	Proportion of people who can always or almost always see or talk to friends and family when they want to (if there are friends and family who do not live with person)	6	Collapse “Most of the time, usually, or some family and/or friends” and “No, or only sometimes”
	Proportion of people who sometimes or often feel lonely, sad or depressed	7	Collapse “Often” and “Sometimes”; Collapse “Not often” and “Never or almost never”
Satisfaction	Proportion of people who like where they are living	8	Collapse “In-between, most of the time” and “No”

Domain	Indicator	Graph #	Recoding/Collapsing Logic
Service Coordination	Proportion of people who would prefer to live somewhere else	9	Collapse “Yes” and “Maybe”
	Proportion of people who like how they usually spend their time during the day	10	Collapse “Yes, always, or almost always” and “Some days, sometimes”
	Proportion of people whose paid support staff change too often	11	Collapse “Yes” and “Some, or sometimes”
	Proportion of people whose paid support staff do things the way they want them done	12	Collapse “No, never or rarely” and “Some, or usually”
	Proportion of people who know whom to call if they have a complaint about their services	13	“Maybe, not sure” response treated as “don’t know” and excluded from both numerator and denominator
	Proportion of people who know whom to call to get information if their needs change and they need new or different types of services and supports	14	“Maybe, not sure” response treated as “don’t know” and excluded from both numerator and denominator
	Proportion of people who can reach their case manager/ care coordinator when they need to (if they know they have a case manager/ care coordinator)	15	Collapse “No, or only sometimes” and “Most of the time, usually”
	Proportion of people whose paid support staff show up and leave when they are supposed to	16	Collapse “No, never or rarely” and “Some, or usually”
	Proportion of people whose services meet all their needs and goals	19	Collapse “No, not at all, needs or goals are not met”, “Somewhat, some needs and goals” and “Mostly, most needs and goals”

Domain	Indicator	Graph #	Recoding/Collapsing Logic
Care Coordination	Proportion of people whose family member (unpaid or paid) is the person who helps them most often	21	Collapse “Paid family member or spouse/partner” and “Unpaid family member or spouse/partner”
	Proportion of people whose family member (unpaid or paid) provides additional assistance	22	Add percentages for “Paid family member or spouse/partner” and “Unpaid family member or spouse/partner”
	Proportion of people who stayed overnight in a hospital or rehab facility (and were discharged to go home) in past year	23	Collapse “Yes, hospital” and “Yes, rehab/nursing facility”
	Proportion of people who reported feeling comfortable and supported enough to go home after being discharged from a hospital or rehab facility (if occurred in the past year)	24	Collapse “No” and “In-between”
	Proportion of people who reported they know how to manage their chronic conditions	27	Collapse “No” and “In-between, or some conditions”
	Proportion of people who have transportation when they want to do things outside of their home	28	Collapse “No” and “Sometimes”
Access	Proportion of people who have transportation to get to medical appointments when they need to	29	Collapse “No” and “Sometimes”

Domain	Indicator	Graph #	Recoding/Collapsing Logic
	Proportion of people who receive information about their services in the language they prefer (if non-English)	30	Collapse “No” and “Some information”
	Proportion of people who feel safe at home	63	Collapse “Rarely or never” and “Most of the time”
	Proportion of people who feel safe around their paid support staff	64	Collapse “No, never or rarely” and “Some, or usually but not always”
	Proportion of people who are ever worried for the security of their personal belongings	65	Collapse “Yes, often” and “Sometimes”
Safety	Proportion of people whose money was taken or used without their permission	66	“Maybe, not sure” response treated as “don’t know” and excluded from both numerator and denominator
	Proportion of people who have concerns about falling or being unstable (or about whom there are concerns)	67	Collapse “Yes, often” and “Sometimes”
	Proportion of people who can get an appointment to see their primary care doctor when they need to	74	Collapse “Sometimes or rarely” and “Usually”
Health Care	Proportion of people who have talked to someone about feeling sad and depressed during the past 12 months (if feeling sad and depressed)	75	Collapse “Yes, friend”, “Yes, family member” and “Yes, doctor or nurse”
Wellness	Proportion of people who describe their overall health as poor	82	Collapse “Excellent”, “Very good”, “Good” and “Fair”

Domain	Indicator	Graph #	Recoding/Collapsing Logic
Medications	Proportion of people whose who reported their health has gotten much better or somewhat better compared to 12 months ago	83	Collapse “Much better” and “Somewhat better”; Collapse “Much worse”, “Somewhat worse” and “About the same”
	Proportion of people who understand why they take their prescription medications and what they are for (if take or are supposed to take prescription medications)	88	Collapse “No” and “In-between, or some medications”
	Proportion of people who feel that their paid support staff treat them with respect	89	Collapse “No, never or rarely” and “Some, or usually”
Rights and Respect	Proportion of people who get asked permission before people enter their home/room	90	Collapse “Sometimes, rarely or never” and “Usually, but not always”
	Proportion of people who have enough privacy in their home (if in group setting)	92	Collapse “No, never or rarely” and “Usually”
	Proportion of people who have privacy with visitors at home if they want it (if in group setting)	94	Collapse “No, never or rarely” and “Usually”
Self-Direction of Care	Proportion of people who can use the phone privately whenever they want to (if in group setting)	95	Collapse “No, never or rarely” and “Usually”
	Proportion of people who can choose or change what kind of services they get and determine how often and when they get them	99	Collapse “No” and “Sometimes, or some services”

Domain	Indicator	Graph #	Recoding/Collapsing Logic
Work	Proportion of people who can choose or change who provides their services if they want to	100	Collapse “No” and “Sometimes, or some services”
	Proportion of people who have a paying job in the community, either full-time or part-time	101	Collapse “Yes, full time” and “Yes, part time”
	Proportion of people who would like a job (if not currently employed)	102	Collapse “Yes” and “Maybe, not sure”
	Proportion of people who generally need a lot or some assistance with everyday activities (Things like preparing meals, housework, shopping or taking their medications)	105	Collapse “A lot” and “Some”
Everyday Living	Proportion of people who generally need a lot or some assistance with self-care (Things like bathing, dressing, going to the bathroom, eating, or moving around their home)	107	Collapse “A lot” and “Some”
	Proportion of people who have access to healthy foods like fruits and vegetables when they want them	109	Collapse “No, never” and “Sometimes”
Affordability	Proportion of people who ever have to skip a meal due to financial worries	110	Collapse “Yes, often” and “Sometimes”
Control	Proportion of people who feel in control of their life	112	Collapse “No” and “In-between”
